

**Geo-Loop Inc.**

# Mighty Grout Model 20-320

The leader in geothermal and water well grouting equipment.

Unbelievable quality at an incredible price! The **Geo-Loop Mighty Grout 20-320** is the definitive answer to your affordable grouting needs. A bulletproof chrome lined piston pump with 20 gallons per minute capability and pressure up to 320 PSI. This compact system is designed to efficiently pump 8,000 bags of grout with less than \$115 of pump piston rubber and valve replacement costs. All parts of this pure power-packed machine fit neatly inside a 3' x 4' footprint skid mount. You'll have to try it to believe it!

***Impressive power---Astounding value!***

Designed and built by professionals who understand *YOUR* needs.

# Mighty Grout Model 20-320

## Features:

- 5" bore, 8" stroke piston pump with one bulletproof, chrome-lined cylinder featuring hammer union construction
- 5" standard A-style piston rubber
- 13 HP Honda electric start engine
- Pumps 0-20 gallons per minute and pressures up to 320 PSI
- Stainless steel paddle mixer with hinged lid cover
- 60 gallon 1/2" thick high density polyethylene mixing tank with smooth taper cone bottom
- 12 gallon hydraulic oil reservoir with a sight glass and thermometer
- Full length fork lift pockets on both ends of the framework
- Lifting ring
- Durable powder coat paint finish
- Stainless steel detachable bag platform
- Super easy clean up corrosion and rust resistant
- Mighty Grout pumps cement, thermal-enhanced sand grouts, and bentonite grouts with ease
- 3' x 4' footprint frame
- Approximately 775 pounds

## Options:

- Water fill pump with fast-fill line and high pressure rinse line package
- Oil Cooler
- Tach hour meter
- Polymer jug holder
- Hose Reel

Maximum theoretical performance shown. Maximum output and pressure can not be reached simultaneously. Performance will vary depending on grout, mix design, and grout line diameter and length. Specifications and products subject to change without prior notice.

Performance meets affordability in the unique, compact engineering accomplishment we call the **Mighty Grout 20-320**. Powered by the toughest single-piston grouting pump in the industry, the unit easily achieves your 0-20 GPM needs up to 320 PSI. A durable, generous 60 gallon 1/2" thick high density polyethylene mixing tank (including an innovative taper cone bottom) gives you the mixing volume you need along with a speedy clean up time. The entire unit weighs in at a mere 775 pounds and thanks to the full length fork lift pockets, it offers the most in job site mobility. It's corrosion and rust resistant, and the durable powder-coat paint framework will keep your **Mighty Grout** looking sharp for years. Several handy options are available also, so be sure to let us custom build one for you!
